

THE BENEFITS OF PXP ROYALE

"Claim back your life. Within your innate blueprint, your body has a plan for health and vitality. Feed the cells and get out of the way!"

-- Dr. Jack Tips

- A major breakthrough in natural nutrition - goes directly into cells and into the mitochondrial powerhouses which create life energy
- Your cells recognize it as biological super-fuel
- Provides nutrients you just can't get in a modern diet
- Rejuvenates the human body and brain, over time, bringing back youthfulness & new levels of vitality
- Lowers cell wall inflammation, thus helping increase cellular receptivity to nourishment, insulin, hormone messengers ...
 - *Cholesterol is an anti-inflammatory*, and is often found in high amounts because of the presence of inflammation. Lower the inflammation via PXP and the cholesterol will likely self-correct.
- A potent antioxidant - neutralizes free radicals causing cell damage, mutation and death linked to metabolic disorders like cancer, heart, disease, Alzheimer's, stroke, diabetes, and all degenerative diseases.
- Stimulates DNA repair (& re-sequencing) after challenges from pollution, toxins, electronic and nuclear radiation
- Much-needed enzymes are made out of the PXP nutrient
- Creates better hormone reception/communication:
 - helps thyroid and other glands function optimally
 - over time helps the body deal with glucose intolerance
- Helps make melatonin for better sleep.
- Increases collagen in skin - resulting in better skin tone
- Cleanses cells of toxic buildup
- Some proponents of PXP think it is the bridge from carbon to silicate/crystalline body for the new time ahead:
 - upgrades, tunes, and harmonizes the body with increased Shumann resonance and new Earth energy
- Creates a bridge back into original, innate blueprint
- Allows & supports the body to use its innate wisdom to heal whatever ails you.

PXP feeds the body at the cellular level. Once the cells receive the proper nutrients, they can produce the proper energy for the DNA to start functioning again, or functioning at a higher level. This process begins to put the body back in its natural order. The body can't function properly unless it gets the proper energy from the cells that are powered by the mitochondria (the tiny little engines in the cells).
